

# Our tools help you focus on what matters the most -- Releasing the Best Product Possible

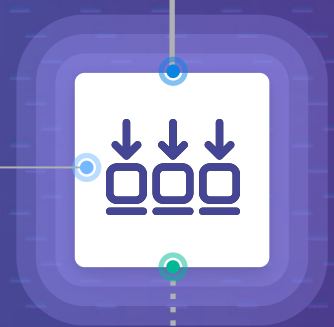

## Simulated XR Input

Enabling you to do 80% of your testing without having to put the headset on

## Powerful Object Identification

HierarchyPath (HPath) is the core of GameDriver and gives complete access and control over objects at runtime.

## Cross-Platform Execution

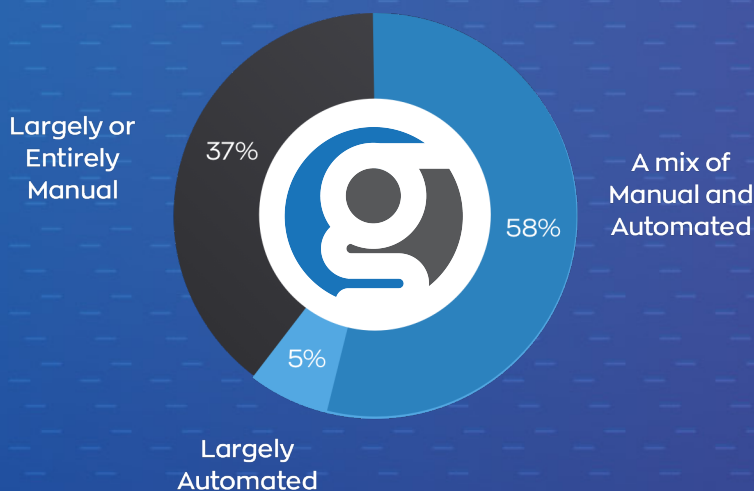

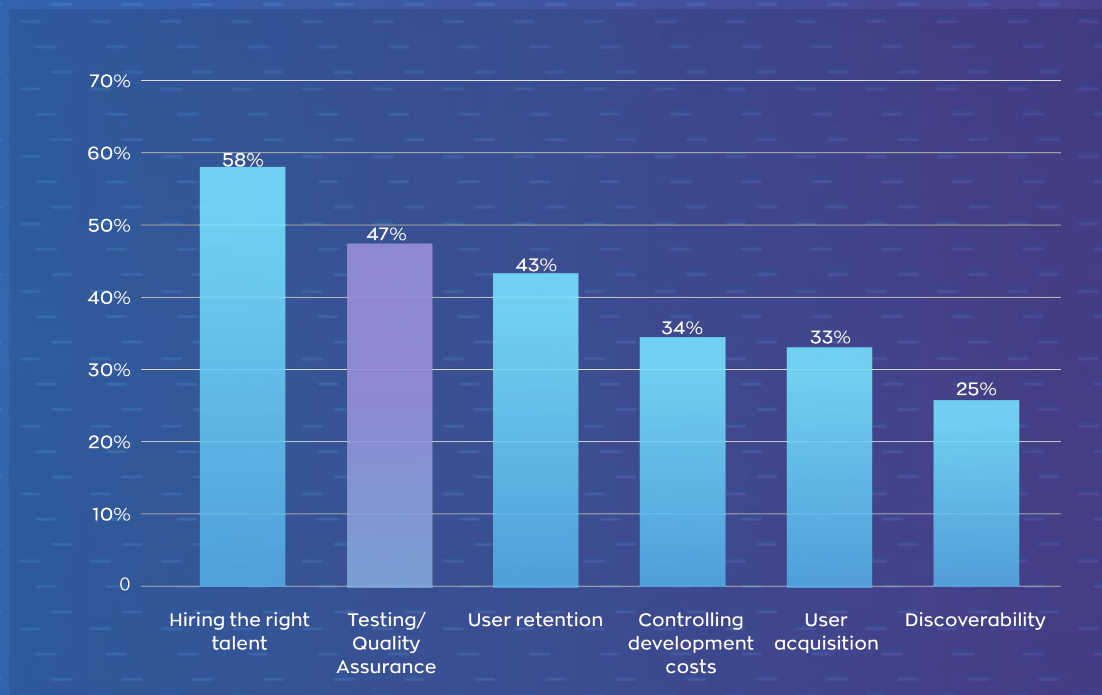

Run tests in parallel across multiple hosts, execute overnight scripts, and achieve other modes of efficient build verification.

## Multi-Engine Support

Engineered to support major game development platforms

# Testing needs to evolve to meet the “next big thing”, and soon...

## Studies show that the 2nd biggest challenge in Game Development is Testing

Yet the vast majority of testing is still performed manually
